Website Development Proposal

SachiKheti

1. Project Overview:

Dear Jaspreet,

Thank you for providing us with the opportunity to develop **SachiKheti**, a modern, full-stack web application designed to showcase and sell agricultural and related products through a unified digital platform.

The proposed solution will include a dynamic, story-driven website, product catalogues, customer authentication, online ordering, WhatsApp-assisted enquiries, Razorpay payment integration, and a centralized superadmin dashboard for managing products, orders, and website content.

The application will be developed with a focus on responsive design, usability, security, performance, and future scalability.

2. Scope of Work:

A. Frontend Development

- Responsive website for desktop, tablet, and mobile devices.
- Dynamic homepage with company stories, videos, services, and promotional sections.
- Product catalogues for farming machinery, manure, dairy products, sweets, and other approved categories.
- Product search, category filtering, product details, and pricing.
- Modern navigation and user-friendly interface.

B. Customer & Ordering System

- Customer registration, login, and logout.
- Customer profile and basic account management.
- Shopping cart and quantity management.
- Order placement and order history.
- WhatsApp-assisted ordering with product details.
- Order confirmation and basic order status tracking.

C. Superadmin Dashboard

- Secure administrator login.
- Product and category management.
- Add, edit, publish, and remove products.
- Manage product prices, images, and availability.
- View and manage customer orders.
- Update order statuses.
- Manage homepage banners and basic website content.

D. Backend & Database

Backend API development using Node.js and Express.js.
Database design and integration using PostgreSQL.
Prisma ORM and database migration setup.
Authentication and authorization.
Order, product, customer, and payment data management.
Input validation and error handling.

E. Payment & WhatsApp Integration

- Razorpay prepaid payment gateway integration.
- Server-side payment verification.
- Basic payment status management.
- WhatsApp click-to-chat ordering workflow.
- Product and order reference sharing through WhatsApp.

Note: Official WhatsApp Business API automation, advanced messaging workflows, and associated provider charges are excluded unless separately agreed in writing.

F. Deployment & Handover

- Basic production deployment and server configuration.
- Nginx reverse proxy configuration where applicable.
- Database configuration and connectivity.
- Functional testing and bug fixing within the agreed scope.
- Source-code handover after full payment.
- Basic technical documentation and handover guidance.

3. Commercial Quotation:

S. No.	Description	Amount
1	Requirement analysis and project planning	₹ 3,000
2	UI/UX design and frontend development	₹ 8,000
3	Backend development and database integration	₹ 9,000
4	Superadmin dashboard and product management	₹ 8,500
5	Customer authentication, cart, and ordering	₹ 5,500
6	Razorpay and WhatsApp integration	₹ 6,000
7	Testing, deployment, and documentation	₹ 5,000
	Total Project Development Fee	**₹ 45,000**

Amount in Words: Rupees Forty-Five Thousand Only (Open to Negotiate).

5. Estimated Timeline:

The estimated project completion period is 4–6 weeks, commencing after receipt of the advance payment, requirements approval, and necessary content and account access.

Note: The timeline may change depending on client approvals, third-party account verification, and integration dependencies.

Phase	Activities	Estimated Duration
Phase 1	Requirement finalization and UI/UX planning	Week 1
Phase 2	Frontend and product catalogue development	Weeks 2–3

Phase 3	Backend, database, and admin dashboard	Weeks 3–5
Phase 4	Payment and WhatsApp ordering integration	Weeks 5–7
Phase 5	Testing, deployment, and handover	Weeks 6–7

6. Client Responsibilities:

- **The client will provide:**

1. Business logo, brand assets, and company information.
2. Product names, descriptions, prices, images, and availability details.
3. Company videos, photographs, and approved website content.
4. Razorpay account and required verification. (Not compulsary can create a new!)
5. WhatsApp business contact details.
6. AWS or other hosting account access, where required. (If not exists provide your mail)
7. Timely feedback, approvals, and testing assistance.
8. The client will remain responsible for the accuracy of product information, applicable business policies, and legal compliance.

7. Infrastructure & Third-Party Charges:

- The quotation covers development services only. The following costs are excluded:
- Domain registration and renewal.
- AWS hosting, database, storage, bandwidth, and backup charges.
- Razorpay transaction fees.
- Official WhatsApp Business Platform messaging charges.
- OpenAI API usage, if added later.
- Other paid third-party tools or subscriptions.
- Local PostgreSQL will be used for development and testing. Production hosting and database services will be configured according to the approved deployment plan. Any AWS promotional credits are subject to eligibility and the provider's terms.

8. Support & Warranty:

- A 15-day bug-fix support period will be provided after project handover for reproducible defects within the approved scope.
- New features, redesigns, and changes to approved requirements are excluded.
- Ongoing maintenance and additional development can be agreed separately.
- Third-party service outages, API changes, and account restrictions are outside the developer's direct control.

9. Terms & Conditions

- Development will follow the scope described in this quotation and the mutually approved requirements.
- Any additional functionality will be estimated and billed separately after written approval.
- The quotation includes two consolidated rounds of minor UI revisions during development.
- The client must provide required content, account access, and approvals within reasonable timelines.
- Third-party accounts and recurring charges will remain the client's responsibility.
- Production deployment is subject to the availability of required credentials and approvals.
- Source-code handover will take place after full payment.
- Any changes to project scope, price, or timeline must be approved in writing.
- The client will approve customer-facing content, payment policies, delivery rules, and other business terms before launch.

10. Acceptance & Authorization:

By approving this quotation, both parties acknowledge the proposed scope, commercial terms, payment schedule, and delivery expectations.
